ACCELERATING CLEAN HYDROGEN DEPLOYMENT TO DECARBONISE THE AMERICAS

Having established itself as the premier gathering for the global hydrogen community in the Americas region, the **Hydrogen Americas 2024 Summit & Exhibition** will return to Washington D.C. on 11 – 12 June 2024.

Clean hydrogen has emerged as a crucially important tool to aid the decarbonization of hard to abate sectors in order to achieve energy security targets and net zero. As part of the Inflation Reduction Act (IRA), the 45V clean hydrogen production tax credit provides projects with a key financial incentive through CCUS.

Following the announcement of 45V alongside the 45Q tax credit, seen by some to be more practical due to there being no restrictive emissions requirements with calculations based entirely on carbon capture, questions remain over their applicability to certain projects based upon size and scale.

With a speaker line up packed with policy makers and key industry leaders from across the US and Americas, the Hydrogen Americas Summit provides the platform for these questions to be discussed at the highest level and for developers to understand the impact of these policies, making use of them in the most optimal way possible.

Register your place today to connect with new business partners and exchange the latest insights to make your hydrogen project a reality.

WATCH LAST YEAR'S SUMMIT HIGHLIGHTS

“ SINCE LAST YEAR, SO MUCH OF THIS HYDROGEN WORLD HAS CHANGED. WE HAVE ACHIEVED A WHOLE SLEW OF MILESTONES, ACHIEVED THROUGH THE FUNDING MADE AVAILABLE BY THE IRA AND THE BIPARTISAN INFRASTRUCTURE LAW, OVER \$150 BILLION OF INVESTMENT IN JUST THE LAST 2 YEARS, PROVING THAT POLICY WORKS WHEN DONE CORRECTLY IN PARTNERSHIP WITH THE PRIVATE SECTOR.

THIS STORY THAT WE ARE WRITING TOGETHER HAS A REALLY GREAT ENDING - CLEANER WATER, CLEARER AIR, AND SCORES OF GOOD PAYING JOBS, AND BEST OF ALL, NATIONS ACROSS THE AMERICAS LEADING THE WAY IN THIS EMERGING CLEAN ENERGY ECONOMY. ”

HON. JENNIFER GRANHOLM

Secretary of Energy
U.S. Department of Energy
